DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 8-10, filed on November 30, 1996, with respect to claims 1-5 and 9-20 have been fully considered and are persuasive. The rejection of claims 1-5 and 9-20 has been withdrawn.

Allowable Subject Matter

2. Claims 1-20 are allowed.

The following is an Examiner's Statement of Reasons for Allowance: Claims 1-5, 9-20 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches a system or method for converting a specified color value from a first color space to a second color space comprising means of or steps for receiving a converted color space value from a final lookup table, the converted color space value being previously determined as a function of the specified color value and a non-iterative mid-point interpolation and representing the specified color in the second color space, wherein operations for performing the mid-point interpolation include one or more addition operations and one or more shift operations or division operations.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Heuscher (US Patent No. 5,481,583) discloses a higher order pre-interpolator for back-projection comprising a back-projector having a parametric order interpolation and a linear interpolator, which performs a linear interpolation on the high order pre-interpolated data lines .
